

Value Based Payment Development and Evaluation

ALTERNATIVE PAYMENT MODELS, FRAMEWORKS AND PROGRAM EVALUATIONS FOR PRIMARY CARE, SURGERY AND ORTHOPEDICS

DEVELOPMENT

Design and implementation of value based payment models and frameworks.

- Bundled payments
- Fee-for-service hybrid models
- Global payment models
- Risk and quality data models for program design
- Flexible frameworks to assist in payment model selection and tuning
- Bonus models

IMPLEMENTATION

Deployment and ongoing support for new or existing models.

- Rate setting and forecasting
- Report development and maintenance

EVALUATION

Program evaluations of value based payment models and frameworks.

- Matched cohort studies
- Synthetic clinical data creation for testing
- Clinical outcomes
- Financial returns and cost containment
- Quality improvement
- Efficiency of care
