

QUANTIFY THE IMPACT OF SOCIAL DETERMINANTS OF HEALTH ON QUALITY PERFORMANCE AND IDENTIFY OPPORTUNITIES TO IMPROVE HEALTH EQUITY

HDD's eQuaFive™ toolkit seamlessly integrates social determinants of health with clinical quality results to see where the need for equity is greatest.

EXPLORE CLINICAL QUALITY RESULTS IN CONTEXT

- Stratify measure results by SDoH domains
- Identify plan populations in their social context
- Measure results against opportunities and barriers

IDENTIFY BOTH CLINICAL AND SOCIAL GAPS IN CARE

- Use eQuaFive™ measures to prioritize interventions
- Show SDoH factors correlated to noncompliance

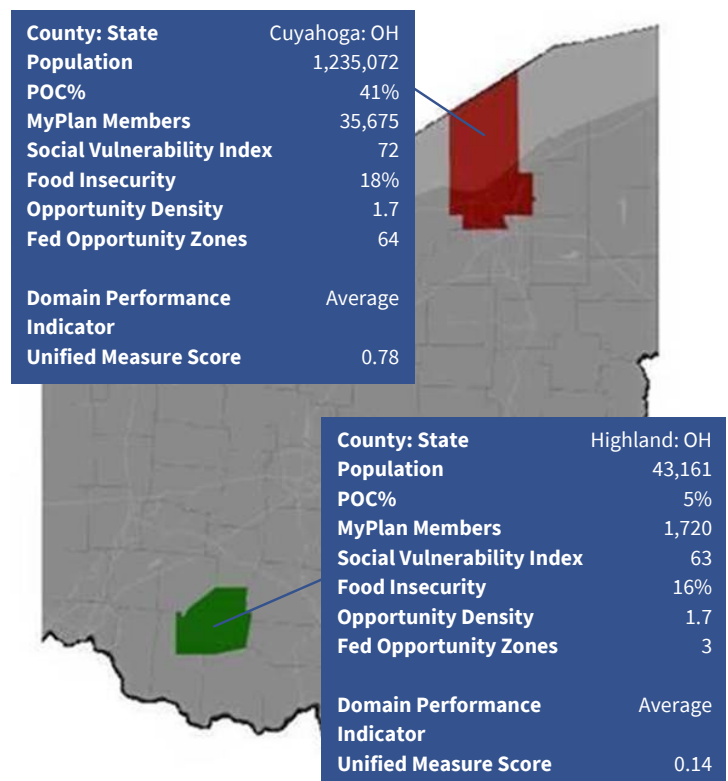

UNDERSTAND HOW TO REACH YOUR POPULATION

- Target the root cause of clinical needs
- Intervene for whole people and not lists of gaps

UNIFIED MEASURES

Proprietary Unified Measures bring many data sources together geographically to help you better understand your members and the unique challenges they face.

- Quality
- Compliance
- SDoH
- Demographics
- Network structure
- Chronic conditions

QUANTIFY THE IMPACT OF SOCIAL DETERMINANTS OF HEALTH ON QUALITY PERFORMANCE AND IDENTIFY OPPORTUNITIES TO IMPROVE HEALTH EQUITY

HDD HELPS TO PUT RESULTS IN CONTEXT

- Unified measurement of clinical priorities
- Quantification of the social environment of health care
- Learn where compliance can be affected by SDoH

TRACK IMPROVEMENTS OVER TIME

- How well interventions overcome SDoH challenges
- View trends and effects of intervention
- Show changes in needs and opportunities

TURN STACKS OF GAP LISTS INTO CARE FOR MEMBERS

- Improve multiple facets of quality at once
- Put individual measure gaps into context
- Focus on overall care and wellness improvement

LIMITED PARTNERSHIP PROGRAM

eQuaFive™ is being tested as part of a limited partnership program with select health plans. Join us to receive insight before the wider release, and before it's too late to improve for the next measurement cycle.
